

I'm a full stack product engineer with a founder mindset. I enjoy tackling hard problems and am always looking to learn. Former founder, future Jeopardy champ.

Experience

Frontend Architect; Director of Engineering — Catch December 2019 — March 2023

- Built the only consumer platform to integrate taxes, banking, investment, and insurance
- Led a feature complete trio of apps (Web, iOS, Android) using React Native, Apollo, and GraphQL
- Launched core features such as payroll withholding, tax payments, and health insurance
- Managed a team of 8 engineers towards this mission
- Architected cross-platform library for navigation, creating a single API to handle navigation across all 3 platforms
- Built a declarative form library to create leverage across complex form flows such as health insurance application

Cofounder — Natured March 2017 — December 2019

- Created an online farmer's market for customers to shop from local food producers in New England
- Responsible for full stack development of site, including marketplace, API, and internal tools
- Built marketplace with over 100 local food producers

Cofounder — Carewell March 2016 — March 2017

- Built platform for family caregivers taking care of a love one with dementia
- 2016 Thiel Fellow

Side Projects

Foodstack: *Platform for food + Bev producers to run wholesale operations*

Clink: *Untappd for cocktail drinkers*

Apprentice: *Expense management app for residential contractors*

Education

Harvard College (BA in Computer Science) September 2012 — May 2016

Thiel Fellowship May 2016 — May 2018

Interests

- Practicing for a future Jeopardy! Appearance
- Renovating an 1899 Victorian
